

PROJECT STATUS TABLE

2025-02-27 PROJECT NAME	ONTARIO PROPERTIES	QUEBEC PROPERTIES	HOLDSWORTH GOLD PROPERTY	ISLAND POND PROPERTY
Region	Northern Ontario – Timmins/ Cochrane Area, and Hearst Area Canada		Northern Ontario – Wawa Canada	Central Newfoundland - Canada
Size	<p>Project 81: ~18,000ha , a VMS/Gold in the Timmins-Cochrane area of Northern Ontario, for which it holds 5-yr exploration rights to explore for gold, silver, copper, lead and zinc;</p> <p>Mann et al Townships: ~38,700 Nickel-Cobalt/VMS/Gold property in the Timmins area of Northern Ontario, includes the Mann, Hanna, Duff, Newmarket, Galna, McCool and Reaume Twps</p> <p>Nagagami River Carbonatite: 716 staked mineral claims covering ~4,600 ha.</p> <p>Boulder property: 214 staked claims covering ~ 3,200 ha in Way Twp near Hearst.</p> <p>Thomas Carbonatite ~2 215 ha near Thomas Twp near Timmins in Northern Ontario.</p>	<p>Buckingham Graphite – 62 Claims (3,700ha)</p> <p>Cere-Villebon – 15 Claims (1,573 ha)</p> <p>Havre St Pierre – 188 Claims (10,152 ha)</p> <p>Chateau – 12 claims (~569ha)</p> <p>Taser North – 10 claims (~461ha)</p>	<p>19 contiguous patented mining claims covering approx. 304 hectares - 16 claims in S. Corbiere Township and 3 claims in N. Esquega Township</p>	<p>In January 2023, the Company acquired 7 claim (175 ha) on strike with Spruce Ridge Great Burnt project currently being drilled by Benton Resources.</p>
Net Interest	<p>Exploration rights to the Project 81, mineral rights subject to a 2% NSR on the patented mineral rights. Holds a 2% NSR on staked mining claims in both Project 81 and Mann et al Twps.</p> <p>Mann et al Townships: ~38,700 Nickel-Cobalt/VMS/Gold property in the Timmins area of Northern Ontario. Noble and Canada Nickel have spun out certain mining claims in and around Mann Township, Ontario into East Timmins Nickel Ltd. (“ETN”), a newly incorporated subsidiary of Canada Nickel, to consolidate their interests in bulk tonnage nickel projects northeast of Timmins, Ontario. Noble owns a 20%</p> <p>Noble has options to acquire 100% interest in the staked claims on the Boulder property, subject to a 2%NSR</p>	<p>Owns the mineral rights subject to a 2% NSR on the patented mineral rights</p>	<p>Owns 100% mineral rights subject 1-5% NSR and 5-10% NPI subject to payback of all historic costs</p>	<p>100%</p>
Strategic Partner	<p>The Company is focused on seeking Joint Venture Partners to expand on all its exploration and development programs.</p> <p>Mann et al Twps – Operated by The East Timmins Nickel Company, a subsidiary of Canada Nickel Company</p> <p>Way Twp – N/A</p>	<p>N/A</p>	<p>N/A</p>	<p>N/A</p>
Operator	<p>Nagagami Way Twp – Noble</p> <p>Thomas Twp - Noble</p>	<p>Noble</p>	<p>Noble</p>	<p>Noble</p>
Target Commodity	<p>Project 81 -VMS/Gold/Copper/Zinc/Silver</p> <p>Boulder Property – Copper/Gold/PGM</p> <p>Nagagami & Thomas Properties – Niobium Nb, Rare Earths</p>	<p>Nickel-Copper-Cobalt-Gold-PGMs- U₃O₈ – REEs - Molybdenum</p>	<p>Gold and Silver</p>	<p>VMS – Copper - Gold</p>

2025-02-27				
Project Name	Ontario Properties	Quebec Properties	Holdsworth Property	Newfoundland Property
Project Description	<p>Project 81 was the subject of exploration programs in the early 1960's. There has been no significant mineral exploration work done in the project area since the 1980's.</p> <p>Cousineau Boulder: The significant discovery of the highly mineralized boulder was in an area that has not seen much past exploration. The discovery of the source of the boulder would be an important mineral find.</p> <p>Thomas Township: The magnetic structure has never been drilled and does not outcrop on surface.</p>	<p>All five properties are highly attractive and have had results from past exploration.</p>	<p>The Holdsworth Property is host to 3 distinct geological environments</p> <ul style="list-style-type: none"> i) Soocana Vein – Lode Gold in traditional quartz veins ii) Oxide Sand Zone – weathered oxide pyrite, and iii) Sulphide pyrite zones at depth 	<p>Totally under/unexplored project for Au and VMS</p>
Current Stage	<p>Lucas Gold Target: In 2018 Noble completed 15 NQ size diamond drill holes totaling 3,183.93m covering approximately 650m strike length of the 1700m Gold Mineralized structure/trend identified from Airborne EM and Differential Mag Surveys. Noble also located a total of 37 historical drill-hole collars during this field program and twinned 3 (three) historical drill holes, namely holes L80-04 with LUC 18-21, L80-13 with LUC18-19 and L81-36 with LUC 18-20, see Table-1. Twinned holes were within a 5m to 15m radius of the historical drill collars. Gold mineralization in the Lucas Gold Deposit, is interpreted to be structurally controlled, discrete stacked lenses hosted in a pyrite + gold mineralized tuff unit and lends itself to vary in gold tenure and gold content within each discrete lens and subsequently throughout the mineralized tuff unit, and as such, exact gold grades would be impossible to duplicate even if the same lens was intersected, in any new drilling campaign.</p> <p>The Crawford Ni-Co-PGM Deposit: After an initial drill program carried out by Spruce Ridge Resources the project was taken over for 22 million shares of Canada Nickel Company with 10million shares going to Spruce Ridge of which 5million have been dividended to its shareholders and 12million shares to Noble of which 10million shares were spun out to the Noble shareholders plus \$2mm (see NR 01/10/2019).</p> <p>The Project 81 Properties Option to Canada Nickel: These properties have been sold to Canada Nickel for 3.5million shares of Canada Nickel which were dividended out to Noble shareholders in Q2 2022 by way off a Return of Capital. Noble has retained a 2%NSR on claims in Bradburn, Mahaffy and MacDiarmid Twps subject to a 50% buyback at graduated rates per project.</p> <p>The Mann et al Twps Properties covering ~38 have been spun out to East Timmins Nickel Inc., 20% owned by Noble and operated by Canada Nickel (see NR 25-02-26)</p> <p>The Nagagami River Carbonatite: Niobium and Rare Earth prospect of ~4,600 ha near Hearst in Northern Ontario on which a two hole drill program was completed in Q3 2022 resulting in a Rare Earths discovery.</p> <p>Boulder Project: The Company drilled to identify the source of the boulder in 2023 following up on a helicopter airborne survey in 2022 and glacial till investigations in 2021. Diamond drilling is planned for 2023.</p> <p>Thomas Carbonatite: ~2,215 ha (see NR 2023-08-17)</p>	<p>Buckingham – See NR 19/05/22 issued by Noble.</p> <p>Chateau – See NR 17/01/25 issued by Noble</p> <p>Cere-Villebon – See NR 27/01/25 issued by Noble.</p> <p>Taser North – See NR 30/01.2025</p>	<p>2020</p> <p>See Aug 25thNR issued by Noble.</p> <p>See Sept 03rd NR issued by Noble</p>
